AN Evo1

## **HEARING – an essential part of quality of life**

See better, understand better. **AN-Evo1** bone conduction hearing spectacles meet every requirement, combining a discreet hearing aid with excellent sound quality and the highest level of comfort, unobtrusively concealed within the frame of your choice. As the world's first digital bone conduction spectacles, **AN-Evo1** provides reliable assistance for both conductive and combined hearing impairment in an elegant and highly effective manner.

Many years of experience, intensive research and development activities as well as continuous collaboration with renowned international hearing aid audiologists and users have all contributed to the phenomenal success of these 'hearing spectacles'.

### ***The spectacles that understand every word***

The well-designed **AN-Evo1** bone conduction spectacles ensure excellent vision and the ability to hear properly, whilst also

being pleasing to the eye. The frame conceals a precise and high-performance hearing aid that works using state-of-the-art technology. Unlike conventional air conduction hearing devices, a small receiver transmits the sound to the mastoid bone (the temporal bone area behind the ear) through direct skin contact. From here, this body-borne sound is conducted via the skull to the inner ear, where it is immediately converted into a neural impulse.

### ***Be all eyes and ears!***

Go about your everyday life calmly and carefree: there should be no limits to good hearing! The **AN-Evo1** uses the biggest possible hearing aid battery to ensure long-lasting and reliable hearing.

Smart and easy to operate, bone conduction hearing glasses are an essential and dependable partner for leisure, business and travel.

Beyond the question of improved hearing – as well as vision – the choice depends upon personal taste, a wide range of sporty, stylish and fashionable casings and nickel-free frames is available to suit individual preferences.

### ***The benefits of AN-Evo1 at a glance***

- Frame and casings available in different colours
- Has a powerful, programmable digital amplifier and a tone control trimmer
- Excellent sound volume
- Easy to use thanks to integrated telecoil function and operating mode switch
- Highly resistant to moisture and dirt
- Also available as CROS system on request
