

Hello,

nowadays there are better and better options to compensate the functions of the acoustic organ.

Bone conduction systems can assist when the inner ear is intact but the outer or middle ear is unable to transmit sound. The sound is then transmitted in the form of mechanical vibrations through the bone and converted into a nerve impulse. Such systems should of course be discreet, comfortable to wear and easy to handle.

We at **bruckhoff hannover** are specialists for many years and have been setting the standards in hearing loss solutions, both technically and in terms of comfort and design.

With the *la belle BC* you have a high quality product „**Made in Germany**“.

the hearing modules
to all your glasses

Click it.

** Your hearing instrument specialist will be happy to check whether the spectacles of your choice meet the required technical requirements.*

Individual and elegant

la belle BC is the individual and elegant way of reducing or even eliminating hearing loss of outer ear or middle ear.

Discreet and distinguished

la belle BC is a perfect combination of spectacles and hearing system. Not any spectacles, but your own personal spectacles – or spectacles of your own choice.* Discreetly integrated and beautifully finished, this new, extra benefit for your spectacles can

hardly be seen, but can certainly be heard. You are used to wear glasses, the hearing system is quickly forgotten.

Exclusive and comfortable

Enjoy a unique hearing system which is individual, exclusive and comfortable to wear, making it agreeably different from comparable bone conduction hearing systems.

la belle BC: Comfort and Premium

You can choose between the two *la belle BC*-systems:

- **comfort**
- **premium**

Both systems are finished to a very high quality and offer maximum wearing comfort. The **premium** version has additional adjustment options and technical features.
